

Genuphil

Genuphil helps decrease cartilage demolition and restore new cartilage. Because Genuphil has no side-effects, it can be used combination with other medicine. Genuphil contains several substances (Glucosamine, Methyl Sulfonyl Methane, Chondroitin) that all work together to help restore vitality and reduce pain and inflammation. Genuphil is a natural formula that is prescribed safely to patients with gastric ulcer, hypertension and diabetes.

Administration

Genuphil is available in both tablet form and syrup form.

Dosage if syrup: One spoon (15 ml) three times daily or as prescribed by the physician.

Dosage if tablets: One tablet every 8 hours before meals.
