

PanthoEva Emulgel

PanthoEva Emulgel is an effective cream to treat tender skin, caused by sun burn, minor burns, and ulcers or otherwise. Through its moisturizing and softening properties, PanthoEva Emulgel is the best choice for tender and soft skin and hands. PanthoEva Emulgel provides the skin with the elements it needs to help in the formation of healthy skin layers. PanthoEva Emulgel is easily absorbed by the skin, and protects the skin against dryness, while preserving its natural texture. PanthoEva Emulgel is non-viscous and does not stick to the skin or clothes.

Application

Use PanthoEva Emulgel for the following ailments: dry hands, cracked nipples, sun burns and minor secondary burns, baby's inflammation from diapers, cracks of the anal opening.

Apply a thin layer of gel on the affected area of the skin twice daily. In case of cracked nipples, apply directly after each feed. In case of cracks of the anal opening, apply directly after each bathroom visit.
